

University of Antwerp City Campus, Antwerp, Belgium

Data Science, Statistics & Visualisation (DSSV) and the European Conference on Data Analysis (ECDA) are a joint conference aimed at bringing together researchers and practitioners interested in the interplay of statistics, computer science, and visualization, and to build bridges between these fields for interdisciplinary research. This conference shall create a forum to discuss recent progress and emerging ideas in these different disciplines and encourage informal contacts and discussions among all the participants. Presentations should thus be oriented towards a very wide scientific audience, and can cover topics such as machine learning and statistical learning, the visualisation and verbalization of data, big data infrastructures and analytics, interactive learning, advanced computing, and other important themes.

DSSV-ECDA 2023 will be hosted by the University of Antwerp (Belgium).
