IASC Early Career Excellence Award – Call for Nominations

The International Association for Statistical Computing (IASC) invites nominations for the **IASC Early Career Excellence Award**, which recognizes outstanding early-career contributions to computational statistics, data science, artificial intelligence, and related interdisciplinary fields.

Eligibility. Nominees must be current IASC members with at least three consecutive years of membership, have completed their most recent academic degree within the past ten years, or be under 40 years of age at the nomination deadline. Eligibility extensions may be granted for parental, caregiver, or documented medical leave. Current members of the IASC Board of Directors and Regional Section Boards are not eligible. Self-nominations are welcome.

Selection criteria: Nominations will be evaluated based on research excellence and impact, interdisciplinary contributions and real-world impact, and engagement with the IASC community through events, education, membership, and leadership.

A **nomination package** should include

- a detailed CV,
- a statement of contribution (maximum two pages),
- at least three letters of support. At least one letter must be from IASC members, and at least one must be from individuals outside the nominee's regional section (if applicable). One of the supporting letters may be provided by the nominator.

Submission: Nominations should be submitted to Ching-Ti Liu (ctliu@bu.edu) by **Jan 15th, 2027**. The committee consists of the Chair of the IASC Awards Committee, the IASC President, the IASC Past President, and one representative from each IASC Regional Section.

The award winner will receive

- a certificate,
- complimentary registration to the next ISI World Statistics Congress or an IASC conference,
- an invitation to be an invited Speaker at an IASC conference. Travel and accommodation expenses are not included.
